

HyperPlus 5e Plenum Rated Category 5e UTP

REF# CS-001

HyperPlus 5e Plenum

Part Number: 10032207

Berk-Tek's HYPER PLUS 5e Standard Category 5e UTP Cables are designed for horizontal network and voice applications in a structured cabling network to connect between the user outlet and horizontal cross-connect.

Description

Berk-Tek HyperPlus 5e, Performance Guaranteed

Your business demands continuous performance from your IT network, so our specifications aren't simply numbers on the page. They define the way that we do business. This means that you are **guaranteed** industry-leading performance and quality for all Berk-Tek products.

Some other manufacturers talk about "typical" values, at Berk-Tek, we hold ourselves to a higher standard. We won't talk about typicals, we talk about what is true, guaranteed, and independently verified.

Keep your business running by relying on Berk-Tek.

Berk-Tek ...Because Your Business Runs Through Us.

Construction

24 AWG bare copper wire insulated with thermoplastic. Two insulated conductors twisted together to form a pair and four such pairs cabled to form the basic unit, jacketed with flame-retardant PVC.

Flame Rating

- Plenum - NFPA 262, CMP
- UL Listed

Features

- Supports most data and voice applications
- ETL Verified to TIA/EIA-568-C.2
- RoHS Compliant

Benefits

- Universally accepted design for global commercial network installations
- Simplified structured cabling solution preserving long-term network investment
- Characterized to 350 Mhz, 250 Mhz greater than the standard

Standards

International ISO/IEC 11801

National ANSI/TIA-568-C.2; UL 444

LANmark-1000 Enhanced Category 6 Plenum Rated

REF# CS-002

LANmark-1000 Plenum

Part Number: 10032026

LANmark-1000 has been improved to offer best-in-class electrical performance. Berk-Tek's engineers completely redesigned LANmark-1000 so that all crosstalk parameters could be improved by four dB. As a result, the Power Sum Attenuation to Crosstalk ratio (PSACR) is nearly 3 times better (at 250 MHz) allowing for much greater signal strength and less vulnerability to noise interference. At Berk-Tek, we understand that your business runs through us.

Description

Berk-Tek LANmark-1000, Performance Guaranteed

Before any cable can display the **Berk-Tek LANmark-1000** legend, it must pass factory tests with **a minimum of 5dB of crosstalk margin beyond the CAT 6 standard for NEXT, PSNEXT, ACR and PSACR**. If the margin is missing, so is the legend. That is our guarantee to you.

Your business demands continuous performance from your IT network, so our specifications aren't simply numbers on the page. They define the way that we do business. This means that you are **guaranteed** industry-leading performance and quality for all Berk-Tek products.

Some other manufacturers talk about "typical" values, at Berk-Tek, we hold ourselves to a higher standard. We won't talk about typicals, we talk about what is true, guaranteed, and independently verified.

Keep your business running by relying on Berk-Tek.

Berk-Tek ...Because Your Business Runs Through Us.

Construction

23 AWG bare copper wire insulated with FEP. Two insulated conductors twisted together to form a pair and four such pairs laid up with crossfiller to form the basic unit, jacketed with flame-retardant PVC.

Flame Rating

Plenum - NFPA 262, CMP, UL Listed

Features

- Full Power Sum Performance
- Documented balance characteristics (LCL, LCTL)
- ETL verified to ANSI/TIA/EIA-568-C.2
- RoHS Compliant

Benefits

- Optimal support for Gigabit Ethernet with headroom
- Power sum characterization gives highest performance using existing applications
- Provides additional bandwidth required for future applications
- Addition of balance requirements improves overall cable performance and reduces cable emissions which results in reduced transmission errors
- Characterized to 550 MHz, 300 MHz greater than the standard

Standards

International ISO/IEC 11801

National ANSI/TIA-568-c.2 Category 6; UL 444

2-7030-24

Description

Rugged steel frame construction, with rolled edges eliminates flex during termination. Rear cable management bar provides cable strain relief. Write-on label and number designations provide easy identification. Labels provide port numbering and T568A/B color-coding for quick installation. Multiple cable tie locations facilitate cable dressing, moves, adds, and changes.

Features

- Available in 12, 24, and 48 port configurations
- Exceeds Category 5e TIA/EIA-568-B.2 specifications for component performance

Specifications

Wiring:	T568A or T568B
Insertion:	>750 cycles
Housing:	High impact, UL 94V-0 rated thermoplastic
IDC Blocks:	Tin lead plated connector accepts 22-26 AWG solid UTP cable
Contact Pressure:	>100 grams
Insulation Resistance:	500 megaohms
Contact Resistance:	<10 milliohms
Voltage/Current:	<140 VDC @ 1.5 amps
Dielectric Withstand:	>1000 VAC RMS @ 60Hz
Safety:	Complies with Part 68 of the FCC Rules and requirements adopted by the ACTA Complies with TIA/EIA Category 6 Specifications

Description

Suttle Category 5e rated patch cords provide performance that exceeds EIA/TIA-568-C specifications for Category 5e channel, basic link, and component performance.

Specifications

- **Dielectric Withstand:** >1000 VAC RMS @ 60 Hz
- **Insulation Resistance:** >500 megohms
- **Contact Resistance:** <20 milliohms
- **Current Rating:** 1.5A at 68 Deg F (20 Deg C) per IEC Publication 512-3, Test 5b
- **Conductors:** 24 AWG 7/32 stranded copper
- **Insulation:** Flame retardant polyethylene
- **Jacket:** PVC
- **Wiring:** Compatible with T568-C
- **Contacts:** Phosphor bronze with 100 microinch nickel with minimum 50 microinch gold plating
- **Plastic Plug:** High impact, UL 94V-0 rated thermoplastic

Features

- Plastic plug housing is flame retardant UL rated 94V0 Thermoplastic
- Mechanical, electrical, and clearance specifications meet FCC Rules and Regulations, Part 68 Subpart F
- Meets Category 5e transmission requirements in EIA/TIA 568-C
- Third party certified
- Supports broadband video and high speed ATM applications
- Complies with TIA/EIA Category 5e Specifications

STAR19110C6-48

Description

These Category 6 Patch Panels are built with rugged steel construction and rolled edges to eliminate flexing. The 12-port Panel includes a bracket for wall mounting; the 24- and 48-port Panels mount in a 19" rack. Rear input connectors are 110 IDC, front output jacks are RJ-45. Connectors can be wired in either 568A or 568B configurations.

Features

- Exceeds TIA/EIA 568-B.2-1 performance specifications
- Supports bandwidth beyond 250 MHz
- Write-on label and number designations provide easy identification
- Rear cable management bar provides cable strain relief
- Multiple cable tie locations facilitate cable dressing

Specifications

Wiring:	T568A or T568B
Insertion:	>750 cycles
Jack Housing:	High impact, UL 94V-0 rated thermoplastic
IDC Blocks:	Tin lead plated connector accepts 22-26 AWG solid UTP cable
Contact Pressure:	>100 grams

ARRA funded projects > \$7,443,000

Brand Features

QuickPort Patch Panels are compatible with all QuickPort modular connectors to maximize versatility with a variety of media applications and enable easy upgrades. The panel fits all industry-standard 19-inch racks and cabinets.

Item Description

QuickPort Patch Panel, 24-Port, 1RU. Cable Management bar included.

Features and Benefits

- Mounts on 19-inch equipment racks
- Accepts all QuickPort-style Connectors
- Includes port numbers
- 49255-H24 and 49255-H48 include write-on blocks
- Rear cable management bar included
- 24-port panels are compatible with Intact Intelligent Port Management System
- Magnifying lens ensures visibility of port labels (49255-L24, 49255-L48)

REF# CS-023

QuickPort® High-Density Die Cast Flat Patch Panel with Cable Management Bar

APPLICATION

The QuickPort High-Density Patch Panel supports 48 ports while filling only 1RU of rack space. It is available unloaded to support a variety of network requirements, and fit all industry-standard 19" racks and cabinets. An excellent choice for both retrofits and new installations, each kit includes one patch panel, labels, a label holder, and a cable management bar.

SPECIFICATION

Patch panels shall feature a 1RU/48-port design that fits industry-standard 19" equipment rack. Panels shall accommodate most QuickPort connectors. Panels shall be UL Listed. Panel shall be constructed of die-cast aluminum, and feature a durable, powder-coat finish. Label holder shall include magnification feature for port identification.

FEATURES

- 48-port density in only 1RU of rack space
- Patented design
- Robust die-cast aluminum construction
- Includes Cable Management Bar (additional bars available separately)
- Multi-color card stock for identification options
- Label holders magnify labels for easy reading

DESIGN CONSIDERATIONS

- Must follow instruction sheets included with each panel
- Panel supports 48-ports in 1RU of rack space
- Mounts on industry-standard 19" equipment rack
- Available in a variety of category ratings and will accommodate most QuickPort connectors
- Recommend jacks be terminated prior to installation in panel
- Recommend use of cable management bar to support bulk and weight of cables
- Design allows for front cable management using no additional rack space
- Empty panels available for retrofits
- Orientation of top-row connectors is rotated 180°

STANDARDS COMPLIANCE

PART NUMBERS

Description	Part No.
QuickPort High-Density Die Cast Flat 1RU Patch Panel (Unloaded, includes Cable Management Bar)	49255-D48
High-Density Cable Management Bar	49005-DMB

Description

Suttle Category 6 rated patch cords offer the higher performance specifications needed for Gigabit Ethernet (1000-Base-T) applications. They feature connectors with improved strain relief and anti-snag latches, and are available in a variety of lengths and colors.

Specifications

- **Dielectric Withstand:** >1000 VAC RMS @ 60 Hz
- **Insulation Resistance:** >500 megaohms
- **Contact Resistance:** <20 milliohms
- **Contact Materials:** 50 microinch (min) gold over 100 micro inch (min) nickel
- **Current Rating:** 1.5A at 68 Deg F (20 Deg C) per IEC Publication 512-3, Test 5b
- **Conductors:** 4 twisted pair, 24 AWG stranded copper
- **Insulation:** Flame retardant polyethylene
- **Jacket:** PVC
- **Plastic Plug:** High impact, UL 94V-0 rated thermoplastic

Features

- Enhanced strain relief at connectors
- Anti-snag latches
- Supports broadband video and high-speed ATM applications
- Backwards compatible with Cat 5 legacy products
- Meets Cat 6 transmission requirements in EIA/TIA 568-C standard
- Mechanical, electrical and clearance specifications meet FCC Rules and Regulations, Part 68 Subpart F

Description

Suttle SpeedStar™ Category 5e modular jacks exceed TIA/EIA-568-C.2 specifications for Category 5e component performance.

SpeedStar™ modules are for use with Suttle's SpeedStar™ faceplates, bezels and surface mount housings. Gel-filled CorroShield® products protect the wiring from contaminants that can affect transmission speeds. Termination requires use of a punch down installation tool.

Available in a white housing, each jack comes with multi-color bezels for your installation.

Product Specifications

Wiring:	568A or 568B
Insertion Life:	750 insertions
Housing:	High impact, UL 94V-0 rated thermoplastic
Contacts:	50 microinch hard gold plating minimum with 100 microinch nickel

Features

- Easy installation from rear of faceplate
- Compatible with SpeedStar™ products (bezels, faceplates, and surface mount housings)
- Terminates with standard 110 termination tools
- Dust covers for IDC terminations
- Jacks equipped with CorroShield® gel protects from dust, moisture, and other components

Electrical Specifications

Contact Pressure:	>100 grams
Contact Resistance:	<10 milliohms
Insulation Resistance:	>500 megohms
Current/Voltage:	140 VDC @ 1.5 amps (2-7001) 140 VDC @ 2 amps (STAR600A&B)
Dielectric Withstand:	1000 VAC RMS @ 60Hz

STAR600A-RC	8-Position, 8-Conductor, 568A, with CorroShield®, 110 IDC Block
STAR600B-RC	8-Position, 8-Conductor, 568B, with CorroShield®, 110 IDC Block

Bezel Colors (-xx): (-51) Green, (-52) Electrical Ivory, (-53) Red, (-56) Yellow, (-62) Blue, (-64) Lt. Almond, (-85) White, (-97) Orange

Gelguard™ gel in the CorroShield® products, is a nonhazardous mixture per OSHA's Hazard Communications Standard (29 CFR 1910.1200). An MSDS is not required. A product safety bulletin is available upon request.

Description

SpeedStar™ Category 6 rated data jacks provide performance that exceeds TIA/EIA-568-C.2 channel and link standards. The new jack design provides quicker and easier wire termination. Angled IDC connector pins aid in maintaining maximum Category 6 performance, providing a gas tight connection and improved cable retention.

Product Specifications

Wiring:	568A or 568B
Insertion Life:	750 insertions
Housing:	High impact, UL 94V-0 rated thermoplastic
Contacts:	100 micro-inch nickel with minimum 50 micro-inch of gold
IDC Blocks:	Tin lead plated connector accepts 22-26 AWG solid UTP cable

Electrical Specifications

Contact Pressure:	>100 grams.
Contact Resistance:	<10 milliohms
Insulation Resistance:	>500 megohms
Voltage/Current:	140VDC @ 2.0 amps
Dielectric Withstand:	1000 VAC RMS @ 60Hz

Features

- Exceeds Category 6 TIA/EIA-568-C.2 specifications for channel and link performance.
- Angled IDC pins aid in maintaining maximum Cat 6 performance, providing a gas tight connection and improved cable retention
- Terminates with standard 110 termination tools
- StarSix modules are compatible with Suttle's SpeedStar or Series 2000 line of bezels, faceplates and surface mount housings
- IDC Cap provides protective strain relief
- 568A/568B color-coded labels facilitate termination
- Easy installation from rear of faceplate
- Complies with Part 68 of the FCC Rules and the requirements adopted by the ACTA

STARMBD

REF# CS-036

STARBDD

REF# CS-037

Features

- Installer friendly
- Copper, coax and fiber applications
- Race way knockouts (4 sides)
- Faceplate mounting (threaded insert, 2 places)
- Can be mounted on a flat surface
- Cable may be dressed on all sides, or though the back
- Supports STAR500S, STAR5501, STAR500AF, STAR5501MM and 107 Faceplates (NOTE: the outside contour matches SpeedStar™ face plates. However, the box is oversized to fit most conventional rectangular single gang faceplates.)
- Complies with TIA/EIA 568-A Cable Bend Radius
- When mounting to a standard NEMA box, use Suttle part number 43A

Description

The STARMBD and STARBDD surface mount box is countoured to match SpeedStar™ faceplates, but is oversized to accommodate most faceplates.

They have rear cable entry and mounting holes to fit most brackets and tear outs on top, bottom and sides for raceway entry.

Mounting over a standard outlet box requires a 43A bracket.

Specifications

Height:	5.25 in. (133 mm)
Width:	3.34 in. (85 mm) - STARMBD
	5.34 in. (135 mm) - STARBDD
Depth:	2.25 in. (57 mm)

Product Information

Product Information

Suttle Part Number	Description
STAR558-xx	1- or 2-port surface mount housing REF# CS-038
STAR107SM-xx	Up to 3-port surface mount housing
STAR108SM-xx	Up to 6-port surface mount housing; <i>Not Available in (64) Light Almond</i> REF# CS-039
STARMMB-xx	Up to 12-port surface mount housing; <i>Not Available in (64) Light Almond</i> <i>Colors (-xx): (-52) Electrical Ivory, (-64) Light Almond, (-85) White</i>

Description

Suttle's Modular Mounting Frames fit standard floor and wall J-Box designs and utilize standard electrical faceplates.

Designed for use with Suttle's line of rear-loading snap-in multimedia modules and colored bezels.

Features

- Available in light almond, electrical ivory, and white
- Designed for Suttle's line of snap-in multimedia modules and colored bezels
- Fits standard NEMA boxes and electrical faceplates
- High impact, UL 94V-0 rated thermoplastic
- Write on label designations for easy identification
- Available in 2 or 4-ports
- Modules snap-fit from the rear
- Inserts provide versatile module configuration options

Product Specifications

Mounting: Zinc-plated mounting screws included
Housing: UL 94V-0 rated

Product Information

Suttle Part Number	Description
STAR1062-xx	2-port mounting frame ← REF# CS-040
STAR1064M-xx	4-port duplex insert style mounting frame (includes mounting plate inserts) ← REF# CS-041
860A-xx	Duplex electrical style faceplate Colors (-xx): (-52) Electrical Ivory, (-85) White

Customer Premise Cross-Connect Wire Spec. 5006

Product Construction

Conductors:

- 22 and 24 AWG solid bare annealed copper

Insulation:

- Flame-retardant semi-rigid PVC

Pairing:

- Two twists per foot minimum
- For ease of identification, a variety of different color options are available

Packaging

- 1000' spool (SP)
- Other lengths and put-ups are also available

Applications

- Suitable for voice and data transmission up to 4 Mbps
- For cross-connecting between terminals of a distribution frame or other premise equipment

Compliances

- NEC/CEC Type CM (UL 1685-2000)
- Category 2 compatible
- RoHS Compliant Directive 2002/95/EC

BACKBOARDS

CS-050 Plywood Backboard, 4' X 4', ea. REF# CS-050

Includes materials and labor to mount a $\frac{3}{4}$ " deep, wolmanized, construction standard type plywood backboard. Backboard will be painted on both sides prior to placement with white fire retardant paint.

STANDARD RACK

KEY FEATURES

- Supports 19" EIA rack-mount equipment designed for two-post panel mounting, like patch panels and network switches.
- Easy positioning of equipment with marked and numbered rack-mount spaces.
- Quick attachment of equipment with threaded equipment mounting holes and included equipment-mounting screws.
- Delivers unassembled in a single carton — quick and easy bolt-together assembly takes less than 10 minutes.
- Lightweight aluminum construction for easy transport and positioning during installation.
- Integrated grounding with a built-in attachment point for a ground (earthing) connection.
- Quickly attach any CPI vertical cable manager to the side of the rack through pre-punched web channel holes.
- Floor-mount holes on the base angles make it easy to secure the rack to the floor with a concrete, wood or raised floor installation kit.

APPLICATIONS

- Use Standard Rack with vertical and horizontal cable managers to support interconnect and network equipment in telecommunications rooms, equipment rooms and data centers.
- Use with shelves to support other equipment.

USE WITH

- Velocity® Cable Management
- Rack and Frame Installation Kit
- Raised Floor Rack Support For 3" (80 mm) Channel

RELATED ACCESSORIES

- 3" (80 mm) Channel Rack-To-Runway Mounting Plate
- Vertical PDUs for Racks
- Rack Shelves

**Easy Equipment Installation**

Marked and numbered
rack-mount spaces (U)

**Prepared Grounding Location**

Built-in attachment point
for a ground (earthing)
connection

The Standard Rack is a high quality, cost-effective storage solution for patch panels and network switches that use less floor space than a cabinet or a four-post rack. The small 20.3"W x 15"D (516.1 mm x 381 mm) footprint makes Standard Rack the best choice in many telecommunications and equipment rooms, especially where floor space is limited.

The Standard Rack meets project specifications, will hold 1,000 lb (453.1 kg) of equipment, has integrated grounding and is UL Listed as a communications circuit accessory. Support 19" EIA wide rack-mount equipment or shelves with the Standard Rack, which is available in three heights. Equipment attaches to the front or rear of the 3" deep (80 mm) vertical mounting channels with screws. Mounting positions are marked and numbered, making it easy to position and install equipment or shelves.

Racks deliver unassembled in a compact carton and are easy to assemble. Components bolt together with included hardware; assembly takes approximately 10 minutes. Two-post racks must be secured to building structure. The Standard Rack has pre-punched base angles, making it easy to attach the rack to the floor using a CPI installation kit for wood, slab or raised floors.

Because most Standard Rack applications require cable management, CPI's vertical cable managers attach directly to the side of the Standard Rack. Vertical cable managers organize cables by rack-mount space simplifying future moves, adds and changes to the network. The best solution includes horizontal managers in-between patch panels and network switches to fan patch cords into individual port connections.

See reverse for product selection. Contact CPI Technical Support for configuration assistance.

SPECIFICATIONS

- Open floor-mount two-post rack supports 19" EIA wide rack-mount equipment.
- For indoor use only, in environmentally controlled areas; may not be used outdoors, in industrial or harsh environments or in plenum spaces.
- Available sizes:
Heights: 84" (2.1 m), 96" (2.4 m), 108", (2.7 m)
Width: 20.3" (516.1 mm)
Depth: 15" (381 mm)
- Equipment space:
Heights: 45U, 51U, 58U
Width: 19" EIA (17-3/4" clearance)
Depth: 20"D (508 mm)
Note: Double-sided shelves for 26"D (660.4 mm) equipment are available. Use QuadraRack™ 4-Post Frame when rack-mount equipment exceeds 20"D (508 mm).
- Equipment Support:
 - 1 pair C-shaped equipment mounting channels fixed in place
 - 19"W, EIA-310-D compliant
 - Universal hole pattern, 5/8"-5/8"-1/2" (15.9 mm x 15.9 mm x 12.7 mm) vertical hole spacing
 - Threaded #12-24 equipment mounting holes; includes 50 each #12-24 equipment mounting screws
- Cable Management:
Use vertical and horizontal cable managers, sold as accessories
- Load capacity:
1,000 lb (453.6 kg) of equipment
- Grounding/Bonding:
 - Top angles, base angles and side channels are electrically bonded by assembly hardware
 - A masked mounting location for a ground lug with two 1/4-20 threaded studs spaced 5/8" apart is provided inside the side channel, near the top and bottom of the rack
 - Use Grounding Jumper (PN 40159-008) as a rack bonding conductor
- Certifications:
 - EIA-310-D compliant
 - UL and cUL Listed as a communications circuit accessory
- Material:
Aluminum extrusion
- Construction:
 - Bolted assembly
 - Ships unassembled
- Finish:
 - Clear grained aluminum or Epoxy-polyester hybrid powder coat paint
 - Available in black, gray, computer beige or glacier white

Bring Wiring Down to Business

Dropping power and communications – neatly and simply – from up there to down here: that’s what Wiremold® Tele-Power Poles are all about. Their sole purpose is to get the business end of your wiring needs down to your office equipment, phones, PCs, and task lighting. Specifically, in away-from-wall locations in open commercial office areas, schools, labs, stores, and other sites.

Whatever kind of power or communications wiring you need to bring down to the desk side, workstations, or cash registers – Wiremold Tele-Power Poles handle all your needs effortlessly. For your modular office furniture – our poles easily provide the hook up to feed office partitions. The poles are available with specialized electrical circuits such as dedicated/isolated ground, and with Sentrex® surge protection modules. Without electrical power; you may devote the vertical drop poles entirely to communications and/or power feeds.

Tele-Power Poles offer a convenient open space solution.

Features & Benefits

- **Wide selection of materials, finishes, wire fill capacities, heights, and devices.** Application versatility in commercial open office landscapes, schools, labs, stores, and manufacturing plants.
- **Communication twistouts.** Allows flexibility and easy access to update wiring.
- **Relocatable.** Ready for service in 30 minutes or less.
- **Dual-channel.** Accommodates electrical power circuits plus receptacles and low voltage cabling.
- **Furnished with feed fittings, ceiling trim plates, T-bar mounting hardware, and carpet/floor grippers.** Includes all components for a complete and stationary installation.
- **Add-On compartment.** Increase cable capacity for 25DT, NP620, and AMTP Series.
- **Dedicated custom capabilities.** Modify receptacles, change enamel and powder coat paint finishes, alter pole heights, add fixture whips, and more. Consult your local Wiremold representative.
- **Datacom connectivity options.** Accepts industry standard and proprietary devices from a wide range of manufacturers to provide a seamless and aesthetically pleasing interface for voice, data, audio, and video applications at the point of use.
- **Connectivity pole.** Pole comes complete with Category 5e connections. 
- **Low voltage cabling entrance fitting.** 2" [51mm] radius control. For use with 25DT and AMDT Series. UL Listed for use in plenum areas.
- **Jumbo poles.** Our largest capacity series to accommodate tomorrow’s wire and cable requirements. 

Steel Tele-Power Poles

- Standard of the industry; combines good looks, economy, and easy installation with sufficient capacity for expansion.
- Ivory enamel finish with matching 20A, 120V NEMA heavy duty duplex receptacles.
- Dedicated circuit pole features separate isolated ground circuit protection.
- Dual channel poles for communication cabling and power wiring accessibility.
- Modular jack knockouts and modular furniture outlets permit direct connections or use "mouse hole" grommet for direct cable feed.

Steel Tele-Power Poles

25DTP-4ACT pole with additional inserts.

3.3.3.4 Ordering Information

3.3.3.1 Product Description

Ceiling clip assemblies are an economical and recognized method of suspending acoustical ceiling grids and panels from concrete and steel. These pre-assembled ceiling clips consist of a sheet steel clip with a pre-mounted powder-actuated fastener and are typically pre-tied with a single

12 gauge wire of varying lengths depending on ceiling height requirements. When the fastening is made, the clip, fastener and wire are installed in one step. Further productivity can be achieved through the use of a Hilti powder-actuated pole tool.

3.3.3.2 Material Specifications

Item	Material	Steel Diameter/Thickness	Plating
X-C Fastener	Carbon Steel	0.138"	5 µm Zinc ¹
X-U Fastener	Carbon Steel	0.157"	5 µm Zinc ¹
CC27 Clip	Carbon Steel	13 GA	5 µm Zinc ¹
Wire ²	Carbon Steel	12, 9 or 8 GA	5 µm Zinc ¹

1 ASTM B633, SC 1, Type III. Reference Section 2.3.3.1 for more information.

2 Pre-mounted ASTM A641/A641M Class 1 wires come attached with a minimum of three tight turns in 1-1/2" length.

3.3.3.3 Technical Data

Allowable Loads for Hilti Ceiling Clip Assemblies Installed in Normal Weight Concrete^{1,2,3,4}

Ceiling Clip	Concrete Compressive Strength					
	4000 psi (27.6 MPa)			6000 psi (41.4 MPa)		
	Tension lb (kN)	Shear lb (kN)	45 Degree lb (kN)	Tension lb (kN)	Shear lb (kN)	45 Degree lb (kN)
X-CC27 C27	160 (0.71)	205 (0.91)	210 (0.93)	-	-	-
X-CC27 C32	220 (0.98)	270 (1.20)	260 (1.16)	-	-	-
X-CC27 U22	-	-	-	80 (0.36)	175 (0.78)	90 (0.40)
X-CC27 U27	160 (0.71)	205 (0.91)	210 (0.93)	125 (0.56)	205 (0.91)	150 (0.67)

1 The tabulated allowable load values apply to the powder-actuated ceiling clip assemblies only, using a safety factor that is greater than or equal to 5.0, calculated in accordance with ICC-ES AC70. Connected components, including wires*, must be investigated separately.

2 Allowable values are for fasteners installed in concrete having the designated compressive strength at the time of installation.

3 Concrete thickness at the point of penetration must be a minimum of the fastener embedment depth plus 1-1/2".

4 Multiple fasteners are recommended for any attachment.

* Note: For Hilti supplied wire, the recommended allowable load capacities of 12, 9 and 8 gauge wire are 210, 400 and 500 lb, respectively.

X-CC Ceiling Clip and Hanger Assemblies 3.3.3

Allowable Loads for Hilti Ceiling Clip Assemblies Installed in Lightweight Concrete Over Metal Deck^{1,2,3,4}

Ceiling Clip Assembly	$f'_c = 3000$ psi Concrete Compressive Strength							
	Lower Flute				Upper Flute			
	Tension		Shear		45 Degree		Tension	
	lb	(kN)	lb	(kN)	lb	(kN)	lb	(kN)
X-CC27 C27	50	(0.22)	275	(1.22)	120	(0.53)	105	(0.47)

							285	(1.27)
							240	(1.07)

- The tabulated allowable load values apply to the powder-actuated ceiling clip assemblies only, using a safety factor that is greater than or equal to 5.0, calculated in accordance with ICC-ES AC70. Connected components, including wires*, must be investigated separately.
- Allowable values are for fasteners installed in concrete having the designated compressive strength at the time of installation.
- Testing completed in 3" deep composite floor deck having a minimum steel deck thickness of 20 gauge (0.0358") and a minimum yield strength $F_y = 38$ ksi. Lower and upper flute width must be a minimum of 3-7/8". Figure 3 in Section 3.3.1.3 shows nominal flute dimensions, fastener locations and load orientations for the steel deck profile. Concrete thickness at the point of penetration must be a minimum of the fastener embedment plus 1-1/2".
- Multiple fasteners are recommended for any attachment.

* Note: For Hilti supplied wire, the recommended allowable load capacities of 12, 9 and 8 gauge wire are 210, 400 and 500 lb, respectively.

Allowable Loads for Hilti Ceiling Clip Assemblies in Minimum ASTM A36 ($F_y \geq 36$ ksi, $F_u \geq 58$ ksi)^{1,2}

REF# CS-054

CADDY CAT HP J-Hook with Multi-Function Clip

- Quick attachment to threaded rod or wire
- Fully adjustable and easy to relocate to accommodate changes once installed
- Provides optimal support for high-performance data cable, up to and including Cat 5e, Cat 6, Cat 6A, Cat 7 and fibre optic
- Provides superior fill capacity and load rating over most other non-continuous cable support alternatives
- Rounded edges on J-Hooks provide proper bend radius support for high performance data cables
- Cost effective alternative to expensive cable tray
- Complies with EN 50174-2
- Meets ISO®/IEC 14763-2, ANSI®/TIA 568 and ANSI®/TIA 569

* Panel also fits these enclosures when height and width dimensions are reversed.

Type 1 medium enclosure panels can be installed in Type 1 medium panel enclosures. Panels are only available in steel and have a white powder paint finish.

Type 1 Medium Enclosure Panels

NEMA flat panels can be installed in Type 4X, Type 4 and Type 12 NEMA Enclosures. Panels are available in steel, galvanized steel, stainless steel, and aluminum. Painted steel panels have a white powder paint finish. Stainless steel and aluminum panels have a smooth brushed finish on one side and protected with PVC film.

NEMA Flat Panels

Notes: Dimensions are in inches. Millimeters shown are for reference only. Data subject to change without notice.

Product Cut Sheet

UNIVERSAL CABLE RUNWAY

Our most popular cable runway is designed for value conscious customers. The Universal Cable Runway offers the industry standard features you've come to expect. With the runway supported every 5' (1.5 m), maximum load with minimal deflection is 132 lb/ft (59.9 kg).

- Made of 3/8" x 1-1/2" x .065" (9.53 mm x 38 mm x 1.65 mm) wall rectangular steel tubing
- Cross members welded at 12" (300 mm) intervals
- Individually boxed to prevent scratches and damage
- Standard length is 9'-11 1/2"/119.5" (3035 mm)
- Underwriters Laboratory Classified for suitability as an equipment grounding conductor only (must remove paint or use ground straps)
- Installation Best Practices includes Runway Elevation Kit

Product Information Sheet

WALL ANGLE SUPPORT KIT

2" x 2" x .105" (50 mm x 50 mm x 2.67 mm) steel support angle is designed for wall mounting specific widths of Cable Runway.

- Kit consists of:
 - 1 each wall angle
 - 2 each 5/16-18 x 2 1/4" J-bolts
 - 2 each 5/16-18 hex nuts
 - 2 each 5/16 lock washers

Local Order Number	111-01332
Type	T120R
Color	Red (RD)
Features and Benefits	HellermannTyton manufactures a full line of high quality cable ties in a variety of styles, sizes, materials, and colors. HellermannTyton cable ties are engineered and manufactured for maximum performance and quality.
Product Description	HellermannTyton heavy duty cable ties offer a higher tensile strength for heavy load applications. The head design guarantees high tensile strength, as well as a low insertion force. The bent tail design allows quick and simple installations by hand. For high volume applications, tensioning tools are available to ensure consistent and safe installation.

Product Dimensions

Minimum Tensile Strength (Imperial)	120.0 lbs
Minimum Tensile Strength (Metric)	535.0 N
Length L (Imperial)	15.2 "

Pan-Way® LD Surface Raceway System

PANDUIT®

SPECIFICATION SHEET

specifications

LD non-metallic series low voltage, one-piece hinged design, single channel surface raceway shall include adhesive backing and shall be made of impact resistant material with a smooth finish that shall not scratch, peel or corrode. The raceway shall include an assortment of bend radius and standard fittings that complement the offering to help route, protect and conceal low voltage data, voice and video cabling. LD raceway shall be available in three sizes and four standard colors that shall be optimized with the Panduit® Pan-Net® communication system.

technical information

Material:	Rigid PVC
Flammability:	UL94V-0; FT4
Capacity:	Single Channel
Voltage Rating:	50V or less
Operating and Storage Temperature:	0 to 50° C

WH (White) has been substituted in model numbers per manufacturers directions for White

key features and benefits

1" bend radius control fittings:	Cables in the raceway will satisfy the minimum 1" bend radius requirement, preventing the potential degradation of cable performance; meets TIA/EIA standards
One-piece hinged design:	Cables can be laid into the raceway, speeding installation and preventing damage to cables
Adhesive backing:	Full length adhesive strip allows easy tool free installation and works well for temporary mounting
Available in different sizes & lengths:	Accommodates varying cable types and capacities. Available sizes - LD3, LD5, LD10 ; Available lengths - 6', 8', 10' (2m length available in Europe only)
Non-metallic construction:	Lightweight, reducing installer fatigue and labor required to install the raceway; solid color throughout will not chip, peel, rust or corrode; easy to cut with standard saws and saw blades, eliminating the need for special cutting devices
Distinct colors:	Available in four standard colors- IW, EI, IG, WH. AW available in Europe only. Raceway is field paintable to match walls and surrounding décor
Full selection of fittings and surface mount boxes:	Wide variety of fittings and surface mount boxes available for various LD raceway applications

applications

Pan-Way® LD Surface Raceways are designed to provide easy and economical solutions for routing any low voltage cable along smooth and clean perimeter walls,

baseboards or ceilings. This raceway is a perfect solution for schools, hospitals, offices, homes or anywhere a small, secure, low profile raceway is needed.

Hilti Cable Management

ELECTRICAL FIRESTOP SOLUTIONS

Hilti. Outperform. Outlast.

LEADING THE INDUSTRY IN FIRE PROTECTION PRODUCTS, SERVICES AND SOFTWARE

Standard Applications

Speed Sleeve CP 653

Just squeeze and twist for an effortless custom fit, with powerful smoke control you'll have to see to believe. Ask us for a demo.

- Don't be misled by imitators and marketing ploys. Jobsite install is different than lab optimized results.
- No Screws, rubber bands, sealant or putty needed
- 2- and 4-inch sleeves, up to 100% fill
- Fully functional immediately after installation

Sleeve Kit CFS-SL SK

Satisfies most requirements for sleeved openings — so instead of wasting time making sleeves, you can move on to the next job.

- Prefabricated 2- or 4-inch sleeve
- Cut-and-mold firestop included
- Meets BICSI requirements for cable fill rates

Cable Collar CFS-CC

The industry's only surface mounted solution for cable bundles up to 4" diameter and up to 100% fill.

- Pre-cured, preformed
- No sealant needed
- Never expires
- For use with existing and new cable runs, independent of wall/ floor thickness

Plugs (Muffins) CFS-PL

It's simple and cost-effective to firestop small openings with this reusable intumescent plug.

- Pre-cured, preformed
- No electric tools or dispensers needed
- Up to 4-inch diameter and 60 % fill

Large Openings and Gang Solutions

Block CFS-BL

Pillows are for sleeping. Blocks are for building.

- Noncuring, dust-free
- One-sided, one-person installation
- No compression or special tools needed
- May be cut to size

Composite Sheet CFS-COS

Firestop large openings without wasting time on anchor methods — this intumescent sheet fastens directly to the surface.

- Customizable multiboard systems
- Fasten with Hilti DX/GX/BX tools — no drilling or anchors needed
- #304 stainless steel construction for good weatherability
- Nonmagnetic — no inductive loss in cables
- Compatible with Hilti Speed Sleeve and gangplate

Gangplate

This gangplate is ready to mount, right out of the package — on a stud or on the surface, before or after drywall.

- Integrated smoke seals — no need for additional firestop materials
- Fits 4-inch Hilti cable sleeves and stud distances of 16 and 24 inches

Conduits and Small Bundles

Cable Disc CFS-D 1"

Firestop small penetrations in 10 seconds or less with no sealant or backfill.

Peel. Stick. Done.

- Surface-mounted
- No sealant or backfill needed
- Up to 1 inch in diameter and 100% fill
- UL systems for a wide variety of base materials and penetrations

FS ONE MAX

This premium firestop sealant is highly intumescent and water-based, so it's easy to dispense and trowel to a smooth finish before painting.

- Smoke-, gas- and water-resistant after curing
- Seals most common penetrations in a variety of materials
- "Buy American"-compliant
- LEED compliant VOC results

Non-Fire-Rated Walls

Smoke and Acoustic Sleeve CS-SL SA

Need sleeves for non-fire-rated walls, too? These lead the industry in air and sound ratings, and self-closing technology makes installation effortless.

- 2- and 4-inch options
- Excellent in-use sound and smoke ratings
- Self-closing
- Electrical, low-voltage/mid-voltage installations and telecom
- "Buy American"-compliant

Why is Hilti no. 1 for firestop solutions?

Software

Automate the most time-consuming tasks.

- **Hilti Button for Firestop** — Automatically identify penetrations, get firestop recommendations and generate reports. Get a free trial at hiltibutton.us.hilti.com (U.S.) or hiltibutton.hilti.ca (Canada)
- **Firestop Documentation Manager (CFS-DM)** — Plan and document every stage of your firestop project in a single application, generating progress reports and work permits at the click of a button. Get a free trial at us.hilti.com/cfs-dm

Website

Connect to support and countless resources.

- **Hilti Online** — Create an account to track your purchases and generate personalized product suggestions at us.hilti.com
- **Firestop Design Center** — Access all of Hilti's firestop resources, from products to software to support, at us.hilti.com/firestop

People

Our experts in the field and in the office have a collective approximate 30,000 years of experience in firestop — and we're here to help. Just call 1-800-879-8000 or contact us at us.hilti.com.

- **Field Engineers** — Consultants for designers and contractors on project specific applications
- **Account Managers** — Highly trained product and application experts
- **Fire Protection Specialists** — Quality assurance/quality control through firestop consultation, job site walkthroughs and accredited trainings
- **Cable Management Specialists** — Fire-rated cable pathway experts specializing in air movement reduction
- **Product Managers** — Identifying market needs and meeting them with innovation
- **Fire Protection Engineers** — Engineering Judgments for your unique applications

Education

Maintain your license and stay current by keeping yourself and your team educated.

- **Webinars** — Accrue professional-development hours at us.hilti.com/webinar
- **Continuing Education Seminars** — Invite us to host your lunch-and-learn at us.hilti.com/continuing-education

Compliance

Hilti helps you keep up with codes, standards and best practices across North America.

25 PAIR - INDOOR BET - 110/110 - COVER & SPLICE CHAMBER

Product Specifications

UL497 Primary Protector for Communication Circuits

NAFTA Country of Origin: CANADA - All Models are "Buy America Act" Approved.

These 16 AWG steel building entrance terminals feature an industry standard 110 - style connector for both the input and output terminals. Also included are multiple external and internal ground lugs. UL approved standard on all terminals. Standard 5-pin protection modules, available in gas tube, solid state and hybrid versions, can be purchased separately. Call for more detailed information on RDUP/RUS-listed units.

Features & Benefits

- 16 AWG Powder Coated Steel Construction
- Equipped with an Internal 26 AWG Fuse Link
- External Ground Connectors Accept 6 - 14 AWG Wire
- Industry Standard 5 Pin Design
- Exceeds UL497 Primary Protection Standards
- Stackable with Connection Grommets Included
- 110 Connector Accepts 22 - 26 AWG Wire

3BIS-300 & 4B1S-300

REF# CS-086

5 PIN - Solid State - Surge Protection Module

Product Specifications

UL 497 Primary Protector for Communication Circuits

The 3B1S-300 is a premium series 5 PIN solid state protector module that is designed to provide superior transient and power fault protection for most standard telephone line applications.

These solid state modules are suited to applications that require the protection of sensitive telephone equipment due to their nanosecond reaction time.

The characteristics of the solid state protector are far superior to gas tube technology in speed and are virtually immune to overshoot, aging and failure due to repeated tripping.

The 4 - Series features PTC (positive temperature coefficient) technology. These optional self-resetting current limiters provide effective protection from 'sneak current' faults. The PTC is vastly superior to the heat coil solution, which requires that the module be replaced after each 'sneak current' event.

Nanosecond Response Time

Internal Failsafe Mechanism that Permanently
Grounds the Module Under Sustained High Current
Conditions

Balanced Operation

UL Listed and RUS Approved

Design to Exceed Telcordia Standards

Integrated Test Points

ISO 9001 Certified Manufacturer

Grounding Busbar – EGBA14410FF

REF# CS-087

Proper bonding is essential to create an equipotential plane between service grounds and equipment during fault and transient conditions. This equipotential plane provides a near-zero voltage differential, and serves to protect people and equipment during these events. The grounding busbar is the most popular bonding product in use today.

- Provides a convenient, single-point grounding and bonding location
- Conductors are welded to the bar using a ERICO CADWELD exothermic connection or are mechanically fastened by using lugs
- Custom bars can be designed and manufactured to customer specifications

Part Number	EGBA14410FF
Material	Copper
Busbar Configuration	Busbar, Insulators and Brackets
Hole Pattern	FF
Mounting Hole Size	0.438"
Length	10"
Width	4"
Thickness	1/4"
Tin Plating	No
Pigtail Included	No
Certifications	cULus
Standard Packaging Quantity	1 pc
UPC	78285646526

Diagrams are representative of the hole pattern. The number of holes is dependent on the length of the grounding busbar. Additional configurations are available by special order. Note special orders may incur additional lead time.

UL, UR, cUL, cUR, cULus and cURus are registered certification marks of UL LLC.

WARNING

Pentair products shall be installed and used only as indicated in Pentair's product instruction sheets and training materials. Instruction sheets are available at erico.pentair.com and from your Pentair customer service representative. Improper installation, misuse, misapplication or other failure to completely follow Pentair's instructions and warnings may cause product malfunction, property damage, serious bodily injury and death and/or void your warranty.

Multi-Pair Category 3
REF# CS-089 and CS-090 (see below for model numbers)

Berk-Tek's Category 3 UTP Power Sum cables are designed for use in voice applications. These cables are used to support building backbone service. They also can be used for interconnecting satellite wiring closets.

Description

Construction

24 AWG) bare copper wire insulated with thermoplastic. Three layer core construction jacketed in flame retardant PVC.

Standards

- North American: ANSI/TIA/EIA-568-C.2, UL 444 and C22.2 No.214-02
- International: ISO/IEC 11801, EU Directive 2002/95/EC (RoHS)

Flame Rating

- Non-plenum-UL 1666, CMR, CMG, IEC 332-1
- Plenum-NFPA 262, CMP
- ELT Listed

Applications

Berk-Tek's Multi-Pair Category 3 UTP Power Sum Backbone cables are intended for data and voice applications including:

- Ethernet 10BASE-T
- Voice

Features

- ANSI/TIA/EIA-568-B.2 Category 3 Backbone Cable
- Supports 10BASE-T and Voice
- Ideally suited for backbone, cross-connect and pre-connectorized assemblies

Benefits

- Assurance that every link will meet the most demanding transmission requirements
- Simplified structured cabling solution preserving long-term network investment

Standards

National ANSI/TIA-568-C.2

UniCam® Connector, SC

50 µm multimode (OM3/OM4 compatible)

REF# CS-091

CORNING

Corning UniCam® SC connectors offer optical performance in a fast, easy field-termination solution ideal for fiber-to-the-workstation applications where setup and teardown time is critical. The high-precision mechanical splice technology enables fiber optic networks to be installed quickly and cost effectively. Installation of an LC, SC or ST® compatible connector can be accomplished in about 50 seconds to one minute with the UniCam High-Performance Tool Kit.

The lightweight, handheld installation tool and high-performance precision cleaver virtually eliminate human variability during installation, ensuring terminations are right the first time, every time. This kit was designed with consideration for network installers, from the cleaver, with its intuitive, hand-held precision design and dual-clamp precision hold, to the installation tool, with its immediate go/no-go feedback signal indicating proper mating of the field fiber to the fiber stub. Installation is as easy as strip, clean, cleave, cam and crimp, with exceptional optical performance assured. Every UniCam® connector is assured to meet the published specification at the time of installation or Corning will replace it.

Corning UniCam® high-performance connectors offer best-in-class optical performance in a fast, easy field-termination solution. These high-precision zirconia ceramic ferrule connectors assured exceptional insertion loss – 0.1 dB typical/0.5 dB maximum per connector pair for multimode, 0.2 dB typical/0.5 dB maximum per connector pair for single-mode. Installation of an LC, SC or ST® compatible connector can be accomplished in about 50 seconds to one minute with the UniCam high-performance tool kit.

Anaerobic Connector, SC

50 µm multimode (OM3/OM4/OM4 extended 10G distance)

REF# CS-092

CORNING

Corning anaerobic-cured connectors offer optical performance in a fast, easy field-termination solution designed for fiber-to-the-workstation applications for single-mode and multimode connections. This connector combines the quick-cured convenience of anaerobic adhesive with the performance of epoxy-and-polish connectors. Ideal for enterprise networks and any installations requiring field-installed connectors, the anaerobic-cured technology enables fiber optic networks to be installed cost effectively with minimal tools. Installation of the connector can be accomplished in minutes with the anaerobic adhesive two-part epoxy process. The adhesive is first injected into the connector ferrule, and then the fiber is dipped into the primer and inserted into the connector. Curing takes only one minute without the use of lamps or ovens. With the hand-polish process, an average insertion loss of 0.2 dB is achieved.

Features and Benefits

Quick-cure epoxy

No lamps or ovens needed

Minimal tools and no index-matching gel

Low installation cost

Hand polished for minimum insertion loss

Reliability and optical performance

Standards

Intermateability

Compliant with TIA/EIA
604-3

CORNING

MIC® Tight-Buffered Cable, Riser

12 F, 50 µm multimode (OM3)

REF# CS-097

CORNING

Corning MIC® riser cables are designed for use in riser and general purpose environments for intrabuilding back-bone and horizontal installations. These multifiber cables use 900 µm buffered fibers to enable easy, consistent stripping and facilitate termination. The fibers are surrounded by dielectric strength members and protected by a flame-retardant outer jacket.

The all-dielectric cable construction requires no grounding or bonding, making these cables ideal for routing inside buildings including riser shafts, to the telecommunications rooms and workstations. The MIC Riser Cables meet the application requirements of the National Electrical Code® (NEC®) Article 770 and the ICEA S-83-596 test criteria. They are OFNR and FT-4 listed for riser and general-purpose use.

This cable is available in 12 different jacket colors – blue, orange, green, brown, slate, white, red, black, yellow, violet, rose and aqua. The colored jacket allows for easy visual identification of the cables. The standard jacket color will be determined by the dominant fiber type in the cable and will use the standard part numbers shown here. CORNING

MIC® Tight-Buffered Cable, Riser

24 F, 50 µm multimode (OM3)

REF# CS-098

CORNING

Corning MIC® riser cables are designed for use in riser and general purpose environments for intrabuilding back-bone and horizontal installations. These multifiber cables use 900 µm buffered fibers to enable easy, consistent stripping and facilitate termination. The fibers are surrounded by dielectric strength members and protected by a flame-retardant outer jacket.

The all-dielectric cable construction requires no grounding or bonding, making these cables ideal for routing inside buildings including riser shafts, to the telecommunications rooms and workstations. The MIC Riser Cables meet the application requirements of the National Electrical Code® (NEC®) Article 770 and the ICEA S-83-596 test criteria. They are OFNR and FT-4 listed for riser and general-purpose use.

This cable is available in 12 different jacket colors – blue, orange, green, brown, slate, white, red, black, yellow, violet, rose and aqua. The colored jacket allows for easy visual identification of the cables. The standard jacket color will be determined by the dominant fiber type in the cable and will use the standard part numbers shown here. Contact Customer Care at 1-800-743-2675 to order other color options.

CORNING

MIC® Tight-Buffered, Interlocking Armored Cable, Plenum

12 F, 50 µm multimode (OM3)

REF# CS-101

Corning MIC® interlocking armored plenum cables are designed for use in plenum, riser and general purpose environments for intrabuilding backbone and horizontal installations. These multifiber cables use individually jacketed TBII® buffered fibers enabling easy, consistent stripping and facilitating termination. The fibers are grouped into jacketed subunits and surrounded by a dielectric central member.

The core is protected by a flexible, spirally wrapped, aluminum interlocking armor that offers easy, one-step installation and up to seven times the crush protection of unarmored cables. With a flame-retardant outer jacket, this cable is particularly useful for heavy traffic or more challenging mechanical exposure conditions and applications requiring extra rugged cables.

This cable is available in 12 different jacket colors – blue, orange, green, brown, slate, white, red, black, yellow, violet, rose and aqua. The colored jacket allows for easy visual identification of the cables. The standard jacket color will be determined by the dominant fiber type in the cable and will use the standard part numbers shown here. Contact Customer Care at 1-800-743-2675 to order other color options.

CORNING

Corning MIC® plenum cables are designed for use in plenum, riser and general purpose environments for intrabuilding backbone and horizontal installations. These multifiber cables use 900 µm buffered fibers to allow easy, consistent stripping and to facilitate termination. The fibers are surrounded by dielectric strength members and protected by a flame-retardant outer jacket.

The all-dielectric cable construction requires no grounding or bonding. MIC plenum cables are ideal for routing inside buildings, within plenum areas and riser shafts, to the telecommunications rooms and workstations. The MIC plenum cables meet the application requirements of the National Electrical Code® (NEC®) Article 770 and are OFNP and FT-6 listed.

This cable is available in 12 different jacket colors – blue, orange, green, brown, slate, white, red, black, yellow, violet, rose and aqua. The colored jacket allows for easy visual identification of the cables. The standard jacket color will be determined by the dominant fiber type in the cable and will use the standard part numbers shown here. Contact Customer Care at 1-800-743-2675 to order other color options.

MIC® Tight-Buffered Cable, Plenum

24 F, 50 µm multimode (OM4)

REF# CS-104

CORNING

Corning MIC® plenum cables are designed for use in plenum, riser and general purpose environments for intrabuilding backbone and horizontal installations. These multifiber cables use 900 µm buffered fibers to allow easy, consistent stripping and to facilitate termination. The fibers are surrounded by dielectric strength members and protected by a flame-retardant outer jacket.

The all-dielectric cable construction requires no grounding or bonding. MIC plenum cables are ideal for routing inside buildings, within plenum areas and riser shafts, to the telecommunications rooms and workstations. The MIC plenum cables meet the application requirements of the National Electrical Code® (NEC®) Article 770 and are OFNP and FT-6 listed.

This cable is available in 12 different jacket colors – blue, orange, green, brown, slate, white, red, black, yellow, violet, rose and aqua. The colored jacket allows for easy visual identification of the cables. The standard jacket color will be determined by the dominant fiber type in the cable and will use the standard part numbers shown here. Contact Customer Care at 1-800-743-2675 to order other color options.

ALTOS® Loose Tube, Gel-Free Cable

12 F, 50 µm multimode (OM3)

REF# CS-105

Corning ALTOS® all-dielectric gel-free cables are designed for outdoor and limited indoor use for campus backbones in lashed aerial and duct installations. The loose tube gel-free design is fully waterblocked using craft-friendly, water-swappable materials, which means cable access is simple and no clean up is required. The flexible craft-friendly buffer tubes are easy to route in closures, and the SZ-stranded, loose tube design isolates fibers from installation and environmental rigors while allowing easy mid-span access. The all-dielectric cable construction requires no bonding or grounding, and these cables have a medium-density polyethylene jacket that is rugged, durable and easy to strip.

Features and Benefits

Gel-free waterblocking technology

Craft-friendly cable preparation

Medium-density polyethylene jacket

Rugged, durable and easy to strip (while providing superior protection against UV radiation, fungus, abrasion and other environmental factors)

All-dielectric construction

Requires no grounding or bonding

Standards

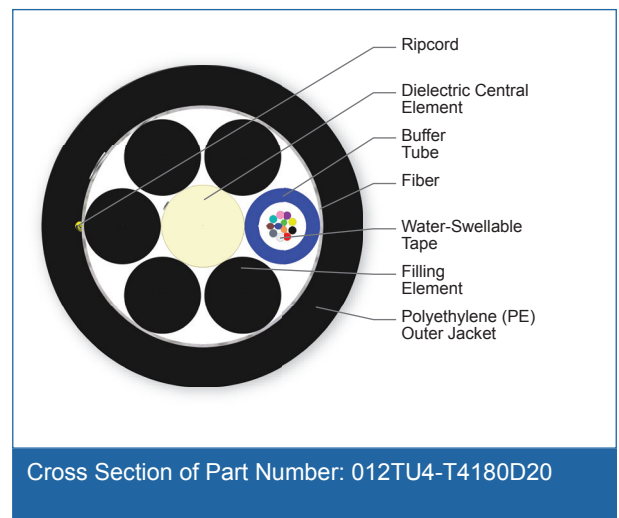

Common Installations

Outdoor lashed aerial and duct; indoor when installed according to National Electrical Code® (NEC®) Article 770

ALTOS® Loose Tube, Gel-Free Cable

48 F, Single-mode (OS2)

CORNING

REF# CS-111

Corning Cable Systems ALTOS® All-Dielectric Gel-Free Cables are designed for outdoor and limited indoor use for campus backbones in lashed aerial and duct installations. The loose tube gel-free design is fully waterblocked using craft-friendly, water-swellable materials, which means cable access is simple and no clean up is required. The flexible craft-friendly buffer tubes are easy to route in closures and the SZ-stranded, loose tube design isolates fibers from installation and environmental rigors while allowing easy midspan access. The all-dielectric cable construction requires no bonding or grounding and these cables have a medium-density polyethylene jacket that is rugged, durable and easy to strip.

Features and Benefits

Gel-free waterblocking technology

Craft-friendly cable preparation

Medium-density polyethylene jacket

Rugged, durable and easy to strip while providing superior protection against UV radiation, fungus, abrasion and other environmental factors

All-dielectric construction

Requires no grounding or bonding

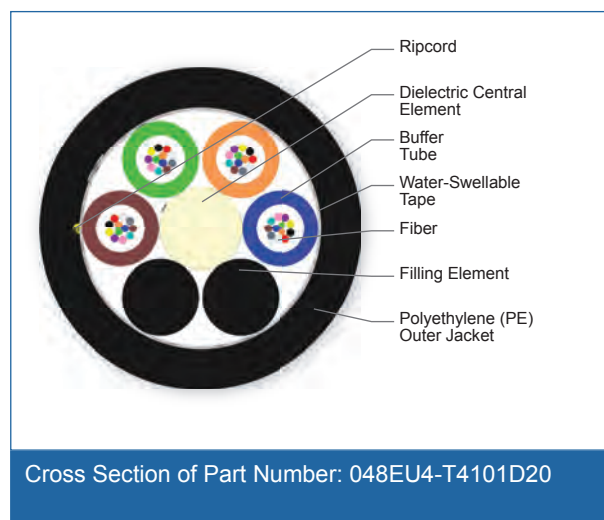

Standards

Common Installations

Outdoor lashed aerial and duct; indoor when installed according to National Electrical Code® (NEC®) Article 770

Design and Test Criteria

ANSI/ICEA S-87-640

ALTOS® Loose Tube, Gel-Free Cable

48 F, Single-mode (OS2)

CORNING

Specifications

General Specifications

Environment	Outdoor
Application	Aerial, Duct
Cable Type	Loose Tube
Product Type	Dielectric
Fiber Category	Single-mode (OS2)

Temperature Range

Storage	-40 °C to 70 °C (-40 °F to 158 °F)
Installation	-30 °C to 70 °C (-22 °F to 158 °F)
Operation	-40 °C to 70 °C (-40 °F to 158 °F)

Cable Design

Central Element	Dielectric
Fiber Count	48
Fiber Coloring	Blue, Orange, Green, Brown, Slate, White, Red, Black, Yellow, Violet, Rose, Aqua
Fibers per Tube	12
Number of Tube Positions	6
Number of Active Tubes	4
Buffer Tube Color Coding	Blue, Orange, Green, Brown
Buffer Tube Diameter	2.5 mm (0.1 in)
Number of Filling Elements	2
Tape	Water-swellaable
Number of Ripcords	1
Outer Jacket Material	Polyethylene (PE)
Outer Jacket Color	Black

Mechanical Characteristics Cable

Max. Tensile Strengths, Short-Term	2700 N (600 lbf)
Max. Tensile Strengths, Long-Term	890 N (200 lbf)
Weight	73 kg/km (49 lb/1000 ft)
Nominal Outer Diameter	10.5 mm (0.41 in)

ALTOS® Loose Tube, Gel-Free Cable

48 F, Single-mode (OS2)

CORNING

Mechanical Characteristics Cable

Min. Bend Radius Installation	158 mm (6.2 in)
Min. Bend Radius Operation	105 mm (4.1 in)

Chemical Characteristics

RoHS	Free of hazardous substances according to RoHS 2002/95/EG
------	---

Fiber Specifications

Optical Characteristics (cabled)

Fiber Type	Single-mode
Fiber Core Diameter	8.2 µm
Fiber Category	OS2
Fiber Code	E
Performance Option Code	01
Wavelengths	1310 nm / 1383 nm / 1550 nm
Maximum Attenuation	0.4 dB/km / 0.4 dB/km / 0.3 dB/km
Serial 1 Gigabit Ethernet	5000 m / - / -
Serial 10 Gigabit Ethernet	10000 m / - / 40000 m

* ITU-T G.652 D compliant.

* Meets 0.75 ns optical skew when used in all Corning Cable Systems Plug & Play™/Pretium EDGE® Systems Solutions.

Notes: 1) Improved attenuation and bandwidth options available.
2) Bend-insensitive single-mode fibers available on request.
3) Contact a Corning Cable Systems Customer Care Representative for additional information.

Custom Orders

- * Custom Orders are not returnable
- * Custom lengths are available in minimum order quantities of 1000 ft.
- * Custom color runs are available in minimum order quantities of 10,000 ft.

Options:

- Two, three, or four way parallel
- Custom print line

How to Build a Part Number:

Position 1 - Product	Position 2 - Size	Position 3 - Configuration	Position 4 - Wall	Position 5 - Color	Position 6 - Pull Line	Position 7 - Length
D = Riser-Gard	E = 3/4" F = 1" G = 1-1/4" H = 1-1/2" J = 2"	4 = Corrugated	X = Standard	1 = Orange 2 = Blue 3 = Gray 4 = White 5 = Green 6 = Black 7 = Yellow 8 = Red 9 = Brown	C = 900 lb. Tape	Example -1000 = Feet -1000S = 1000 Feet Split

Carlon Plenum-Gard®

Applications: Plenum, Riser and General Purpose Applications per Articles 770 and 800

- UL Listed to 2024 Standard**
- Maximum flame propagation distance is less than 5.0 ft.
 - The peak optical density of smoke is less than 0.50
 - The average optical density of smoke is less than 0.15

Position 1 - Product	Position 2 - Size	Position 3 - Configuration	Position 4 - Wall	Position 5 - Color	Position 6 - Pull Line	Position 7 - Length
C = Plenum-Gard	E = 3/4" F = 1" G = 1-1/4" H = 1-1/2" J = 2"	4 = Corrugated	X = Standard	1 = Orange 2 = Blue 3 = Gray 4 = White 5 = Green 6 = Black 7 = Yellow 8 = Red 9 = Brown	C = 900 lb. Tape	Example -1000 = Feet -1000S = 1000 Feet Split

Product Type - 3" 3-Cell

3" 3-Cell

For use in 3" or larger conduits, the 3" 3-Cell product is designed to hold cables up to 1.05" in diameter in each cell. Up to 3 packs can be placed in a 4" conduit.

- Standard colors are black, blue and red
- Color-coded pull tapes are pre-installed
- Factory lubricated

3" 3-Cell pack overriding existing cable plant in 4" conduit

3" 3-Cell packs holding 9 cables in 4" conduit

3" 3-Cell Application Guide

General Guidelines When Using MaxCell in Various Applications

MaxCell 3" 3-Cell (Equivalent to three 1.25" I.D. innerducts) This product was designed for use in 3" or larger ducts. Multiple combinations of large, medium and smaller cable sizes are applicable and anticipated.

Min Conduit ID	Suggested Product	Max # of Packs	Max # of Cables	Maximum Cable Diameter per Cell	Rec. Pull Length*	Max Pull Length*
3"	MaxCell 3" 3 Cell	2	6	1.05"	1250'	2000'
4"	MaxCell 3" 3 Cell	3	9	1.05"	1250'	2000'
5"	MaxCell 3" 3 Cell	4	12	1.05"	1250'	2000'
6"	MaxCell 3" 3 Cell	5	15	1.05"	1250'	2000'

*Use of OFNR cable may result in reduced pulling lengths. Exceeding more than two 90 degree bends or a total of 180 degrees of bends between any two pulling points or installation into trenched duct may also result in reduced recommended pulling lengths.

Closet Connector Housing (CCH)

1 rack unit, holds 2 CCH connector panels

CORNING

REF# CS-115

Designed based on thousands of hours of customer feedback, Corning Cable Systems Closet Connector Housings (CCHs) offer more than two dozen innovative features that make installation and troubleshooting of fiber optic connectivity faster, easier and more cost effective.

From fiber and cable routing and strain relief, to port labeling and termination, these housings reduce the risk of error that can disrupt networks.

Closet Connector Housings (CCHs) provide interconnect or cross-connect capabilities between outside plant, riser or distribution cables and opto-electronics. Like all LANscape Solutions hardware, the housings accept CCH connector panels. In addition, the housings accept CCH cassettes and CCH modules.

The units are designed for rack mounting in 19-in (48 cm) racks or optional 23-in (58 cm) equipment racks (1.75-in EIA hole spacing). They are available in rack space options of 1U (two panels, cassettes or modules), 2U (four panels, cassettes or modules), 3U (six panels, cassettes or modules) and 4U (twelve panels, cassettes or modules). The 1U, 2U and 3U options feature a slide-out tray and see-through, removable top covers. The CCH-04U features a clear door, removable front and rear enclosures and a platinum-painted interior for maximum visibility and access.

Every CCH housing is shipped complete with strain relief brackets, routing clips and guides, and mounting brackets for proper installation. Documentation labels are provided and components can be added as needed to construct a fiber distribution frame for any application. All housings include a removable tinted polycarbonate front door. All size housings have field-installable lock kits available for both front and rear doors.

All CCH housings can also be upgraded for pigtail splicing to full fiber capacity and easy, modular fiber management through the use of CCH Splice Cassettes (CCH-CS), or for easy, modular fiber management when using field-installable connectors through the use of CCH Slack Cassettes (CCH-CF).

Part Number: CCH-01U

Features and Benefits

Interconnect and cross-connect capability

Ideal for field connectorization

Removable, translucent top covers (1U, 2U, 3U), removable rear cover (4U)

Visibility and ease of access for installation, testing and troubleshooting

Closet Connector Housing (CCH)

1 rack unit, holds 2 CCH connector panels

CORNING

Features and Benefits

Internal and external strain-relief options

Flexibility for installation and moves, adds and changes (MACs)

Accepts panels, modules and cassettes

Variety of field termination options

Adaptable to use as a modular splice housing

Splices are stored and protected in same footprint

Standards

Approval and Listings

Meets ANSI/TIA/EIA-568A and 606

Closet Connector Housing (CCH)

two rack units, holds four CCH connector panels

CORNING

REF# CS-116

Closet connector housings (CCHs) provide interconnect or cross-connect capabilities between outside plant, riser or distribution cables and opto-electronics. Like other LANscape solutions hardware, the housings accept CCH connector panels. In addition, the housings accept CCH cassettes and CCH modules.

From fiber and cable routing and strain relief, to port labeling and termination, these housings reduce the risk of error that can disrupt networks.

The units are designed for rack mounting in 19-in (48 cm) racks or optional 23-in (58 cm) equipment racks (1.75-in EIA hole spacing). They are available in rack space options of 1U (two panels, cassettes or modules), 2U (four panels, cassettes or modules), 3U (six panels, cassettes or modules) and 4U (12 panels, cassettes or modules). The 1U, 2U and 3U options feature a slide-out tray and see-through, removable top covers. The CCH-04U features a clear door, removable front and rear enclosures and a platinum-colored interior for maximum visibility and access.

Every CCH housing is shipped complete with strain relief brackets, routing clips and guides, and mounting brackets for proper installation. Documentation labels are provided and components can be added as needed to construct a fiber distribution frame for any application. All housings include a removable tinted polycarbonate front door. All size housings have field-installable lock kits available for both front and rear doors.

Wall-Mountable Connector Housing (WCH)

Holds 2 CCH connector panels/cassettes

CORNING

REF# CS-118

Corning wall-mountable connector housing (WCH) product family offers enhanced innovative features that make installation and troubleshooting of fiber optic connectivity faster, easier and more cost-effective. From fiber and cable routing and strain-relief to port labeling and termination, these housings reduce the risk of error that can disrupt networks.

The WCH housing provides interconnect or cross-connect capabilities between the outside plant, riser or distribution cables and the opto-electronics. With the WCH-02P (two panels, cassettes or modules), WCH-04P (four panels, cassettes or modules), and WCH-06P (six panels, cassettes or modules) capacity, the rugged metal housings can be wall mounted in main cross-connects, telecommunication rooms or other areas where space is a premium. Units accept standard closet connector housing (CCH) cassettes, connector panels and modules for a variety of connectivity options.

The WCH product family features a clear, transparent jumper side door for easy visibility during installation and testing, easy-to-use recessed mounting holes with mounting screws, documentation labels, removable strain-relief brackets, routing clips and guides, improved latches, as well as a preinstalled bubble level for simple and accurate installation. All housings also have field-installable lock kits available for both cable entry and jumper side doors.

Features and Benefits

Interconnect and cross-connect capabilities

Ideal for field splicing and connectorization

Accepts CCH cassettes, panels and modules

Variety of preterminated and field-installable capabilities

Lockable, transparent jumper side door

Visibility and ease of access for installation, testing and troubleshooting

Removable strain-relief bracket

Flexibility for installation and moves, adds and changes (MACs)

Segregated cable and fiber slack routing

Fiber protection

Pretium EDGE® Solutions Trunk Cable, 50 µm multimode (OM3)

MTP® Connector to MTP Connector, 24 F, with 33/33 inch legs, pulling grip one side, 70 ft

CORNING

REF# CS-135

Pretium EDGE® Solutions trunk cables utilize the MTP® Connector, a 12-fiber push/pull optical connector with a footprint similar to the SC simplex connector. These high-density connectors are used to significantly accelerate the network installation process, minimize errors and reduce space. Pretium EDGE Solutions trunks utilizing MTP Connectors support 12 to 144 fibers.

Pretium EDGE® Solutions trunk cables utilize a high-density cable solution, which results in up to 65 percent space savings. Five to six times the fiber tray capacity can be achieved over traditional bulkier cabling solutions while minimizing cable tray weight and cooling air impediment. The trunk cables contain Corning® ClearCurve® optical fiber, which enables a bend radius of five times the cable outside diameter and allows for smaller slack storage coils or loops. The cables feature a 2.0 mm round furcation leg which provides easy routing and improved slack storage.

Pretium EDGE® Solutions trunks feature a furcation plug design that offers stress-free strain-relief of the cable, and a small-profile furcation plug allows installation of all fiber counts inside a 1U housing. All trunks are shipped with appropriate strain-relief brackets for integrating into both Pretium EDGE Solutions housings and Plug & Play™ Systems housings. The trunk furcation features a transition boot for smooth transition out of rack/floor hardware. The flexibility of the grip allows easy installation around the corners of tray and ladder racks, while its robust design allows the trunk to be pulled through conduit using up to 100 lb of pulling tension while providing complete protection for the connectors. All trunks are packaged on a plastic corrugated reel for easy installation. This reel can be easily broken down for cost-effective disposal. Pretium EDGE Solutions trunks have been tested and meet the skew criteria to ensure the system is 100G Ready.

Part Number: G757524TPNDDU070F

Features and Benefits

High-density trunk cables

Allow tighter trunk cable bends for slack storage and routing

Low insertion loss performance

Allows for more connections in a link when deploying a TIA-942-compliant system

Universal wired components

Enable moves, adds and changes without polarity concerns; provide a simple migration path between 2-fiber and parallel optic applications

Pretium EDGE® Solutions Trunk Cable, 50 µm multimode (OM3)

MTP® Connector to MTP Connector, 24 F, with 33/33 inch legs, pulling grip one side, 70 ft

Features and Benefits

Factory-terminated solutions

Provide consistent quality, ensure system performance and reduce installation time

Standards

Approval and Listings

Pretium EDGE® Trunk Cable

50 µm multimode (OM3), MTP® Connector to MTP Connector, 48 F, with 33/33 inch legs, pulling grip one side, 120 ft

CORNING

REF# CS-136

The Pretium EDGE® MTP® Trunks provide the backbone of the Pretium EDGE Solution. With nonpinned MTPs on both ends of the cable, these trunks are designed to interface with the Pretium EDGE or Plug & Play™ modules. All trunks are shipped with strain-relief clips that allow for the tool-less installation in both Pretium EDGE and Plug & Play housings. These trunks conform to TIA-568 Type-B polarity.

Features and Benefits

High-density trunk cables

Allow tighter trunk cable bends for slack storage and routing

Pretium EDGE® Solutions Trunk Cable, Bend-improved Single-mode (OS2)

MTP® Connector to MTP Connector, 24 F, with 33/33 inch legs, pulling grip one side, 80 ft

REF# CS-137

CORNING

Pretium EDGE® Solutions trunk cables utilize the MTP® Connector, a 12-fiber push/pull optical connector with a footprint similar to the SC simplex connector. These high-density connectors are used to significantly accelerate the network installation process, minimize errors and reduce space. Pretium EDGE Solutions trunks utilizing MTP Connectors support 12 to 144 fibers.

Pretium EDGE® Solutions trunk cables utilize a high-density cable solution, which results in up to 65 percent space savings. Five to six times the fiber tray capacity can be achieved over traditional bulkier cabling solutions while minimizing cable tray weight and cooling air impediment. The trunk cables contain Corning® ClearCurve® optical fiber, which enables a bend radius of five times the cable outside diameter and allows for smaller slack storage coils or loops. The cables feature a 2.0 mm round furcation leg which provides easy routing and improved slack storage.

Pretium EDGE® Solutions trunks feature a furcation plug design that offers stress-free strain-relief of the cable, and a small-profile furcation plug allows installation of all fiber counts inside a 1U housing. All trunks are shipped with appropriate strain-relief brackets for integrating into both Pretium EDGE Solutions housings and Plug & Play™ Systems housings. The trunk furcation features a transition boot for smooth transition out of rack/floor hardware. The flexibility of the grip allows easy installation around the corners of tray and ladder racks, while its robust design allows the trunk to be pulled through conduit using up to 100 lb of pulling tension while providing complete protection for the connectors. All trunks are packaged on a plastic corrugated reel for easy installation. This reel can be easily broken down for cost-effective disposal. Pretium EDGE Solutions trunks have been tested and meet the skew criteria to ensure the system is 100G Ready.

Features and Benefits

High-density trunk cables

Allow tighter trunk cable bends for slack storage and routing

Low insertion loss performance

Allows for more connections in a link when deploying a TIA-942-compliant system

Universal wired components

Enable moves, adds and changes without polarity concerns; provide a simple migration path between 2-fiber and parallel optic applications

Pretium EDGE® Solutions Trunk Cable, Bend-improved Single-mode (OS2)

MTP® Connector to MTP Connector, 24 F, with 33/33 inch legs,
pulling grip one side, 80 ft

Features and Benefits

Factory-terminated solutions

Provide consistent quality, ensure system performance
and reduce installation time

Standards

Approval and Listings

NFPA 262, National
Electrical Code® (NEC®),
OFNP, CSA FT-6

Specifications

General Specifications

Application	Data Center LAN/SAN
Cable Type	Indoor; ANSI/ICEA S-83-596
Flame Rating	Plenum (OFNP)
Fiber Category	Bend-Improved SM (OS2)
Cable Assembly Type	Pretium EDGE® Trunk

Temperature Range

Operation	-10 °C to 60 °C (14 °F to 140 °F)
-----------	-----------------------------------

Design - Connector A

Connector Type	MTP® (non-pinned)
Ferrule	Composite

Optical Specifications - Connector A

Reflectance, Typical	< -55 dB
Insertion Loss, Max.	0.75 dB

Pretium EDGE® Solutions Trunk Cable, Bend-improved Single-mode (OS2)

MTP® Connector to MTP Connector, 24 F, with 33/33 inch legs,
pulling grip one side, 80 ft

Design - Connector B

Connector Type	MTP® (non-pinned)
Ferrule	Composite

Optical Specifications - Connector B

Reflectance, Typical	< -55 dB
Insertion Loss, Max.	0.75 dB

Cable Design

Fiber Count	24
Outer Jacket Color	Yellow
Polarity	Universal; TIA-568 Type-B

Mechanical Characteristics Cable

Nominal Outer Diameter	7.7 mm (± 0.3 mm)
Min. Bend Radius Installation	115.5 mm (4.55 in)
Min. Bend Radius Operation	38.5 mm (1.52 in)
Max. Tensile Strength for Installation	660 N
Weight	50 kg/km (110 lb/1000 ft)

Furcation - Connector A

Leg Length	838 mm (-0 mm/+76 mm) (33 in (-0 in/+3 in))
Leg Diameter	2.0 mm
Leg Color	Yellow
Furcation Type - A	Pretium EDGE® Size 1; 14.7 mm x 14.7 mm x 108.6 mm

Furcation - Connector B

Leg Length	838 mm (-0 mm/+76 mm) (33 in (-0 in/+3 in))
Leg Diameter	2.0 mm
Leg Color	Yellow
Furcation Type - B	Pretium EDGE® Size 1; 14.7 mm x 14.7 mm x 108.6 mm

Pretium EDGE® Solutions Trunk Cable, Bend-improved Single-mode (OS2)

MTP® Connector to MTP Connector, 24 F, with 33/33 inch legs,
pulling grip one side, 80 ft

Pulling Grip - Connector A

Pulling Grip - Connector A	Yes
Outer Diameter	41 mm (1.6 in)
Min. Duct Size Diameter	64 mm (2.5 in)
Tensile Strength	440 N (100 lb)

Pulling Grip - Connector B

Pulling Grip - Connector B	No

Chemical Characteristics

RoHS	Free of hazardous substances according to RoHS 2002/95/EG
------	---

Fiber Specifications

Optical Characteristics (cabled)

Fiber Type	Single-Mode Ultra-Bendable Fiber
Fiber Core Diameter	8.2 µm
Fiber Category	OS2
Fiber Compliance	ITU-T G.652.D and ITU-T G.657.A1
Fiber Code	G
Wavelengths	1310 nm / 1383 nm / 1550 nm
Maximum Attenuation	0.4 dB/km / 0.4 dB/km / 0.3 dB/km
Serial 1 Gigabit Ethernet	5000 m / - / -
Serial 10 Gigabit Ethernet	10000 m / - / 40000 m
Induced Attenuation @ 10 mm Radius	0.5 dB (1 turn; 10 mm radius; 1550 nm)

* ITU-T G.652 D compliant.

* Meets 0.75 ns optical skew when used in all Corning Cable Systems Plug & Play™/Pretium EDGE® Systems Solutions.

Notes: 1) Improved attenuation and bandwidth options available.
2) Bend-insensitive single-mode fibers available on request.
3) Contact a Corning Cable Systems Customer Care Representative for additional information.

EDGE™ Trunk Cable

Bend-improved Single-mode (OS2), MTP® Connector to MTP Connector, 48 F, with 33/33 inch legs, pulling grip one side, 100 ft

CORNING

REF# CS-138

EDGE™ MTP® trunks provide the backbone of the EDGE Solution. With non-pinned MTP connectors on both ends of the cable, the trunks are designed to interface with EDGE or Plug & Play™ modules. All trunks are shipped with strain-relief clips that allow for tool-less installation in both EDGE and Plug & Play housings. The trunks conform to TIA-568 Type-B polarity.

CABLING ONLY – CABLING & SUPPORT STRUCTURE

Other Miscellaneous Charges

CS-139 Air Travel Expense for Neighbor Islands

Air Travel expenses for Technicians traveling to or from Neighbor Islands will not be necessary in most cases as on-island Technicians will be used on projects and only during extenuating circumstances may Technicians travel to and from Neighbor Islands be required (ie..emergencies or if requested by the state to meet unforeseen rgetnt dead-lines). Travel expenses will be airfare.

CS-140 Lodging Expense for Neighbor Islands, day

Lodging expenses for Technicians traveling to or from Neighbor Islands will not be necessary in most cases as on-island Technicians will be used and only during extenuating circumstances may Technicians travel to and from Neighbor Islands be required (ie..emergencies or if requested by the state to meet dead-lines). Travel expenses will be lodging.

CS-141 Shipping Expense for Neighbor Islands

Shipping expedited air freight is used to offset any additional air freight incurred to expedite delivery of materials required for emergency or customer expedite due date requirements and may only occur in rare situations and can only be assessed when needed due to weight and time variations.
