CAPABILITY STATEMENT (RFI-15003)

Core Competencies

HP Helicopters currently operates Bell medium and Sikorsky heavy-lift helicopters out of multiple locations across the Western States. Our clients range from small contractors to State and Federal governments. We are a manufacturer of HP Blackhawks under our own FAA (R00054SE) type-certificate. Operating multiple heavy and medium aircranes with a perfect safety record and no lawsuits shows we take our air crane business, customer service reputation, and safety record very seriously. We are a competent and creditworthy (family-owned) company, and we enjoy working for companies or contractors with similar values.

Past Performance

United States Forest Service, Department of the Interior, California Fire Department Emergency Response Washington Department of Natural Resources, Oregon Department of Forestry, and government agencies. Motive Energy and Telecommunications, Communication Relay, NextEra Energy, etc.

** Additional (confidential) information about current and past customers available, upon specific request.*

Differentiators

High Performance Helicopters specializes in uniquely challenging “one-off” projects that require creative-thinking and a particular expertise that other operators may not possess. What sets us apart from the competition is our commitment to safety and customer service. Flexibility, adaptability, and communication allow us to maintain a positive and safe work environment resulting in consistent business and satisfied clients.

Corporate Data

Incorporated in 2005, High Performance Helicopters is based in Southern California with helicopter operations throughout the United States and Mexico. Our typical project area is Washington State, Oregon, and California. HPH owns three rotary-wing aircraft and currently employs 13 professionals. Additional company, project, aircraft, and performance data can be found on our website: www.hphelicopters.com
