To help you understand your role, we've laid out an easy-to-follow Rapid Deployment Process designed to take you from signed contract to installed machine within 30 days (although customers who are serious about saving have been able to achieve this in as little as 12 days). Keep in mind that our process is designed to minimize the tasks required by the customer, so the ones that are itemized (indicated in bold below) are critical to deployment and require immediate attention. One thing we've learned after thousands of installations: When the customer and the Fastenal sales rep work together, the process moves quickly and smoothly.

### STEP 1

- Sign Agreement
- Product Template per machine (work w/Fastenal)
- Ship badges to Fastenal (unless access will be keypad only)

### STEP 2

- Initial call to branch & end user
- Product testing
- Confirm 110v&Cat5 (Note: customer responsible for all fees associated with internet hardware installation and monthly service fees charged by internet service provider)
- Employee Template

### STEP 3

- Fastenal ships special order items for testing
- Receive Network Worksheet from site

### STEP 4

- Testing completed
- Plan-O-Gram created

### STEP 5

- Plan-O-Gram approved
- Site Network Test
- Machine sent for configuration

### STEP 6

- Registration of the machine with Apex
- Installation date confirmed

### INSTALL DAY

- Machine installed!
- Software training
