

Project Overview: Transforming State Procurement with Aloha eBUYS

The State of Hawaii is proud to introduce **Aloha eBUYS**, a cutting-edge, cloud-based eProcurement solution designed to modernize and elevate the state's procurement operations. This transformative platform will redefine how Executive Branch Departments procure goods and services, fostering greater efficiency, transparency, and accessibility while enhancing collaboration with vendors across the board.

Key Features of Aloha eBUYS

Aloha eBUYS is built to support end-to-end procurement processes. The State of Hawaii is now focusing on two foundational components:

- 1. Marketplace Feature**
 - A centralized, user-friendly platform for purchasing goods and services.
 - Seamless access to pre-approved contracts and product catalogs for streamlined transactions.
- 2. Solicitation and Contract Management**
 - Simplifies the entire solicitation process, from creating bids to evaluation and awarding contracts.
 - Automates contract creation by directly converting awarded bids into finalized agreements.

Pilot Rollout

Aloha eBUYS is initially being piloted with select users from the following agencies:

- **State Procurement Office (SPO)**
- **Department of Transportation (DOT)**
- **Department of Health (DOH)**
- **Enterprise Technology Services (ETS)**

Upon successful completion of the pilot phase:

- The **Marketplace features** will be expanded statewide.
- **Solicitation and Contract Management functionalities** will be deployed across all Executive Branch Departments.

Aloha eBUYS is a step forward in modernizing state procurement, ensuring a future of streamlined, transparent, and efficient processes for all.
